

PMO ASE SYSTEMS ENGINEER

QTEC Aerospace is seeking a PMO ASE Systems Engineer to join our team of professionals in Huntsville, AL. The qualified applicant will become part of a team of professionals representing both industry and government. The successful candidate will be detail oriented, have a proven track record and a positive work ethic.

Job Summary

QTEC Aerospace is looking for highly capable and motivated individuals. The selected candidate will function as an integral member of a team of Government, military, and contractor personnel that provide program, engineering, and technical support to Project Management Office, Aircraft Survivability Equipment (PMO ASE) programs. The PMO ASE is an acquisition management organization under the Program Executive Office (PEO) Intelligence Electronic Warfare and Sensors (IEW&S).

Job Duties/Responsibilities

The candidate will work in the Technical Division supporting the Systems Engineering Functional Lead. Duties will include, but will not be limited to, the following:

- Applying a clear understanding of the systems engineering process for ensuring requirements traceability from the system level down to the component level throughout the acquisition life cycle.
- Reviewing and analyzing traditional and object-oriented Model-Based Systems Engineering (MBSE) Analysis artifacts and deliverables received from PMO ASE Product Contractors to ensure complete requirement analysis, requirement traceability and identify parentless/childless requirements.
- Supporting risk management and mitigation activity to include coordinating and facilitating the Risk Management Review Board meetings, defining the risk management plans, implementing appropriate tools, risk monitoring, and /or development of risk mitigation plans.

Minimum Education and Experience

- Bachelor's degree in Engineering or a related field
- 0 - 5 years of experience in the defense industry

Desired Knowledge, Skills and Abilities

- Experience with Model-Based Systems Engineering (MBSE)
- Experience with systems engineering concepts throughout the acquisition life cycle.
- Experience with risk management and mitigation activity.
- Excellent verbal and written communication skills, including ability to collaborate with cross-functional teams, and prepare and brief presentations to the customer as needed.
- Self-motivated and customer-oriented.

Security Clearance

Candidates must currently have and be able to maintain a minimum DoD SECRET level security clearance.
